Farm Business Management

Dairy Farm Business Analysis

3 days

This course assists farmers and their advisers to better monitor, analyse and understand farm business performance. It covers the importance of getting annual farm physical and financial numbers right, how to interpret farm performance and understand cash, profit and wealth for a dairy farm business. It is recommended for all dairy farmers and their advisers.

Presented by John Mulvany

Program

Day 1—Foundational knowledge

Provides an understanding of farm performance and business management principles including:

- farm business performance measures
- principles of a well-balanced dairy business
- roles of different performance measures and tools

Day 2—Using DairyBase—farm case study

- preparing for a farm business analysis
- entering data into DairyBase
- getting your numbers right

Day 3—Farm business performance

Interpret results from DairyBase to understand what they might indicate about your business including:

- compare your farm performance over multiple years or with industry data.
- interpret results from DairyBase and understand what they might indicate about your business.
- share your data with other users such as your consultant or accountant.
