

Nutrition Fundamentals

A two-day basic nutrition course

Feeding dairy cows profitably is an issue of utmost importance to all dairy farmers.

This two-day course, with an experienced dairy nutritionist, provides participants with information on how to efficiently and effectively use supplements while still maximising pasture consumption.

Topics covered include:

- The importance of getting nutrition right
- Ruminant digestion and factors that limit intake
- Condition scoring
- The cost of rearing young stock
- Nutrients supplied by different feeds
- Balancing the diet
- Feed budgeting
- Comparing cost of nutrients
